

## SILIKON KD

### SILICONIC ANTIFOAMING AGENT

#### CHEMICAL COMPOSITION

Silicon oil in emulsion

#### CHARACTERISTICS

<i>Appearance:</i>	<i>white coloured dense liquid</i>
<i>pH in solution at 10%:</i>	<i>6,5 – 7,5</i>
<i>Dilution system:</i>	<i>water</i>

#### PROPERTIES

**SILIKON KD** is an excellent silicone anti-foam and its effect against the foam is immediate.

**SILIKON KD** can be used as it is or prediluted in water. Its emulsions, even if very diluted, are stable.

**SILIKON KD** is used in several industrial fields, where there are problems due to an excessive foam formation; so it is suitable for depuration plants as well as for any other industrial process that produces foam.

#### USAGE METHOD

**SILIKON KD** is a product easily dilutable in water. The dilution does not reduce its exceptional speed of foam elimination.
