

## SINTOIL OPB

FATLIQUOR AUXILIARY

### CHEMICAL COMPOSITION

Refined triglycerides

#### CHARACTERISTICS

<i>Appearance:</i>	<i>light yellow oil</i>
<i>Active substance:</i>	<i>approximately 100%</i>
<i>Stability to light:</i>	<i>optimum</i>
<i>Freezing point:</i>	<i>approximately - 10° C</i>
<i>Behaviour in water:</i>	<i>insoluble</i>

### PROPERTIES

**SINTOIL OPB** is a fatliquor product constituted of pure triglycerides, non treated chemically, refined and purified at a low temperature. This product can be used in the fatliquoring of all types of leather. **SINTOIL OPB** has a filling action and does not form fatty exudates, inasmuch that decomposable free fatty acids are not contained in the oil. The oil is stable when cold: it advantageously substitutes natural ox foot oil and confers good hydrophobic (water repellent) properties. **SINTOIL OPB** is particularly suitable for increasing the surface fats. According to the effect desired, the additions vary from 10 to 30 parts of the entire quantity of fatliquor used.

Our suggestions for the use of the products correspond to our present knowledge. They do not release the purchaser in any way whatsoever from the responsibility of carrying out their own tests to establish the suitability of the products supplied in relation to the results that are to be obtained. The usage methods of the products are not within our control and therefore become the complete responsibility of the purchaser. We guarantee the quality of our products in respect of the general sales and supply terms and conditions.

## USAGE METHOD

Advice for the emulsion: the necessary quantity is slowly mixed with the part of emulsifiable fatliquor. This mixture is emulsified a short while before use with 4 - 6 parts of water at 50°C - 60°C. It must be remembered that the addition of 10 - 25 parts of **SINTOIL OPB** to the fatliquoring mixture gives a particularly favourable action.
