

## SOLFOL SWL/D

FATLIQUOR FOR LEATHER

### CHEMICAL COMPOSITION

Sulpho-esters of long chain alcaans

### CHARACTERISTICS

<i>Appearance:</i>	<i>white creamy liquid</i>
<i>Active substance:</i>	<i>45 - 50%</i>
<i>pH of the emulsion at 10%:</i>	<i>6,5 - 7,5</i>
<i>Solidity to light:</i>	<i>good</i>
<i>Resistance to ageing:</i>	<i>good</i>
<i>Ionic charge:</i>	<i>anionic</i>

### PROPERTIES

**SOLFOL SWL/D** is a fatliquor that penetrates uniformly in all the zones of the hide and confers a leather writing surface effect and a dry touch, even though maintaining a firm and elastic grain.

With the use of **SOLFOL SWL/D**, the characteristic colour of the chrome hides becomes more clear and remains unchanged, even under the prolonged action of light. The softness result is optimum when mixed with BERFAT DH or BERFAT C1.
