|-------------------------------|----------------------------|
| <i>Appearance:</i> | <i>creamy white liquid</i> |
| <i>pH in solution at 10%:</i> | <i>1-2</i> |
| <i>Ionic charge:</i> | <i>nonionic</i> |

PROPERTIES

TENSIOL PFV has been appropriately formulated for cleaning and degreasing of felts blocked with tannin. Thanks to its particular composition that has been formulated from an in-depht study with third parties that effectuate the pressing of vegetable leather, we have realised a detergent that manages to amply satisfy the problems that are created when it is necessary to clean a felt that is blocked with tannin.

TENSIOL PFV manages to completely clean felts blocked with tannin leaving the felts in the best condition.

USAGE METHOD

TENSIOL PFV is diluted in hot water in a ratio of 1:5
